

Richard K. Brow is Curators' Professor of Ceramic Engineering in the Materials Science and Engineering Department at Missouri S&T (Rolla, MO), where he teaches undergraduate and graduate classes on glass science and technology, and ceramic processing. His research interests include studies of the structure, properties and applications of glasses, including novel materials for optical, electrical and biomedical uses. Prior to his arrival at Missouri S&T in 1998, he was for thirteen years a staff member at Sandia National Labs (Albuquerque, NM), where he helped develop a variety of glasses for specialty sealing applications. He holds twelve US patents and has over 200 archival journal and conference proceedings publications. He serves or has served in leadership positions for a variety of national and international professional organizations, including as president of the American Ceramic Society (2012-13) and as a founding member of the Ceramic and Glass Industry Foundation (2015-).
