

Gerald DiGiampaolo worked for PPG Industries for 35 years in the Flat Glass Division. He was a superintendent of float glass production in manufacturing and worked on process development in the research and development group. He has co-authored several flat glass process training manuals and presented training classes in domestic and overseas PPG glass plants. He has a BS in Ceramic Engineering from Rutgers University and retired from PPG in 2009. Since retirement, he has been a consultant for PPG. He makes his home in Kerrville, Texas.
