NEI Corporation, a leading developer and manufacturer of Advanced Materials, is seeking a highly motivated individual with a background in either Materials Science or Materials Engineering. Experience in either Coatings or Batteries will be beneficial.

The primary job responsibility for this position will be new product development through partnership and collaboration with customers. The position entails hands-on work in the laboratory/shop floor, along with interfacing with customers. The individual will need to combine technical knowledge with sales skills to provide advice and support to the customer.

Candidates meeting the requirements for this position may come from a wide variety of technical fields such as Materials Science and Engineering, Chemical Engineering or Electrochemistry, with either a BS or MS degree. Two to five years’ experience with chemical or materials industry is preferred for this position.

This position is open only for Citizens or Permanent Residents of USA.
