Transportation

Chair: Hilary Lewis

Goals from last meeting: Get in touch with Chris about the bus. Come up with a focus group for transportation services. Make a prioritized list of places to de-ice to show maintenance just so they have student perspective on ice priorities. Also look into setting up a link to work orders for ice on the Senate page or through some other medium.

Progress made from last meeting: We have been in touch with Chris about the bus and TRACS. There will be surveys going around and an add in the Brown and White. We have a list of future focus group members. We made a list of dangerous ice stricken areas. Though this was not a goal we also came up with an idea for our section of the senate movie.

Goals for this week: Once we find out where to send our list (we have asked Sharon for some advice) we will send it on. Also, we will work with whoever gets this list on a system that allows students to send in work-order requests for ice areas. We need to set a date for the focus group and come up with questions we want to ask in addition to those Bryn will ask. Also, we heard back from Chris about additional signs, but there seems to have been a misunderstanding about what goes on those signs, we need to correct this.

Action steps to take this week: Make/confirm a date for the focus group. Work on a site design for the work order page. Work with Chris to show him where we want the new signs for the busses-- the main stops not the TRAC stops.
