

1. Text: Lay, *Linear Algebra and its Applications*, 3rd Edtn. Selected portions of Chapter 1 - 5 will be covered. We may also cover some additional topics depending upon interest.

2. Attendance is expected at all lectures. If necessary, attendance will be encouraged using in-class quizzes, possibly without further announcement. There will be two hour exams, the first on Wednesday, October 5th; the second on Wednesday November 9th.

3. Carefully written solutions to homework, will be emphasized - in lecture and in determining your grade in the course.

4. Grades are based on:

Hour Exams	200
Final	200
Homework and Quizzes	200
Total	600

5. Homework 1 will be due on Wednesday, September 7. Read sections 1.1 - 1.5, and solve each of the following problems: 1.1: 9, 10, 12, 19, 20, 22, 28; 1.2: 1 c,d, 2 b, c, 7, 11, 12, 19. Turn in your solutions to the even numbered problems (only!).
