Bioethics of Experimental Ebola Treatments
The administration of an experimental serum to two American healthcare workers treated for Ebola on US soil raises questions of safety, efficacy, access, and ethics.

Bioethicist: Experimental Ebola Treatment Endorsed, But Who Gets It?
By Arthur Caplan
Genetically Modified Organisms involved in Ebola drug treatment (not discussed in class – follow for discussions later in semester)

A biotech greenhouse associate replaces young tobacco plants of a unique strain in the greenhouse at Medicago USA, Inc.
