

Stem Cells and Ethical Considerations

- What are stem cells?
- What are the types of stem cells?
- Where do stem cells come from? What different methods can be used to generate stem cells?
- Why is the study of stem cells of particular interest in biology?
- What are some of the ethical considerations? Think about this after class in the framework of Dr. Robin Dillon's lecture last time as well.
- What are some of the challenges in this research?
