

Student Profile

Name	Ebony Holliday
Email	elh2@lehigh.edu
U. Grad. Degree(s)	B.A., Psychology, Shippensburg University M.Ed., Counseling, Indiana University of Pennsylvania
Research Interests	School-based health promotion in children and families, Early intervention for academic and behavioral issues in children, Family intervention for children with chronic illness, specifically Sickle Cell Disease
2005 -2006 placements	Allentown School District – William Allen High School, Lehigh Valley Hospital
Why interested in the project	<p>Specialized training in pediatric school psychology will allow me to be better able to meet the needs of children who are dealing with physical and/or psychological conditions. Such conditions have the potential to adversely affect various areas of individuals' functioning and therefore, applying consultation, assessment, and intervention skills to a specialized area would allow me to better serve and work with a range of individuals in the pediatric population.</p> <p>Additionally, I strongly believe in the importance of prevention programs for children and families regarding various educational, social/environmental, and health related issues. Becoming involved with the creation and/or delivery of health prevention types of programs directed toward giving children and/or parents the skills, knowledge, and resources they could utilize is of great importance to me.</p>
