

## Student Profile

Name	Ravit R. Stein
Email	<a href="mailto:Rrl3@lehigh.edu">Rrl3@lehigh.edu</a>
U. Grad. Degree(s)	B.A. – Clinical Psychology Tufts University, May 2001 M.S. – Applied Educational Psychology - School Psychology Northeastern University, September 2003
Research Interests	School-Based Health Promotion; Students with chronic illness; Linking schools and healthcare settings
2005 -2006 placements	Children’s Hospital of Philadelphia - Inpatient Rehabilitation Unit - Center for the Management of ADHD & ADHD in Primary Care Initiative Rhoads Elementary School, School District of Philadelphia
Why interested in the project	Children who are healthy are more ready to learn, and schools have been identified as practical and logical environments for health promotion to occur. My interest in being a part of the Pediatric Leadership Training Grant arose from my belief that linking healthcare professionals, families, and schools would result in positive results for students. As part of the grant, I have had the opportunity to work across clinical and school settings to gain knowledge and skills in creating health promotion programs in schools and linking systems to aid students with health and mental health issues. As a pediatric school psychologist, I plan to develop school-based initiatives that will be effective in guiding children and adolescents toward a healthy future filled with personal and academic success.
