I am working with a company that is looking for a PhD Materials Scientist/Engineer with 3-10 years of industrial experience. People who have worked in the aerospace or automotive industries are preferred.

- Ph.D. in materials science and engineering with at least three years experience in a technical research and development role.
- Strong mechanistic understanding of crystal growth, morphology, modifiers, and interaction with organic materials
- Demonstrated track record of value creation
- Demonstrated track record of innovations in new materials and rapid translation to the marketplace

My name is LARRY RIEDERER and I am a Technical Recruiter with a company called Chemical Personnel Search. All I do is recruit and place people in the Chemical Industry. CPS has been recruiting and placing scientists for over 35 years. I have a wide range of positions and levels. The following are some of the areas: Polymers, Resins, Coatings, Adhesives, Inks, Composites, Plastics, Pharmaceutical, Nutraceuticals, Food and Specialty Chemicals.

These can be: Organic/Polymer Synthesis, New Product Development, Analytical/Characterization, Quality Control, Process Development, Materials Science, Regulatory and others. These are from BS to Ph.D. and from Entry Level to Vice-President. If I can be of any assistance, please contact me at the address above.
