

## **POSITION DESCRIPTION**

**Position Title:** Materials Scientist, Materials Engineer Intern  
**Function/Division/Location:** Research, Development & Technology/Graco/Exton  
**Immediate Supervisor:** Engineering Manager

### **Basic Purpose**

This individual will support Research, Development & Technology with material research and evaluation during a summer internship at Baby & Parenting Essentials (Graco), a division of Newell Rubbermaid. This position is located in Exton, PA.

### **Essential Functions**

- Interface with Materials Engineering, Quality, Purchasing, and Compliance Departments to accomplish a variety of tasks related to materials science and engineering.
- Assist in obtaining and reviewing Materials Safety Data Sheets (MSDS's) and Technical Data Sheets (TDS) for creation of MSDS database to insure Global Compliance.
- Position will interface with current and potential external suppliers as well as internal departments to accomplish assigned tasks.
- Collaborate with designers on assigned tasks which may include, materials property review and selection, failure analysis and corrective action, and report generation.

### **Minimum Qualifications**

- Currently pursuing Bachelor of Science in Materials Science, Polymer Science, or Chemical Engineering.
- Completed at least one (1) introductory course in materials engineering or polymer science
- Excellent written and verbal communication skills
- Ability to effectively accomplish tasks in dealing with a variety of departments
- Proficiency in MS Word and Excel
- Database creation experience is desirable

Position is located within the Baby and Parenting Essentials Group, (Graco R&D) Center located in Exton, PA.
