

## **Physics 362: Information about Exam 2**

There will be an exam on Friday November 11, 2005 (2:30 to 4:00 pm) in Room LL 311. The exam will be closed book, but you may bring one sheet of notes, size 8 ½ by 11 inches, written on both sides, in addition to the sheet you made for exam 1. (If you didn't keep the sheet from exam 1, you may bring two new sheets of notes to this exam.) The exam itself will contain the information given on the inside cover of Eisberg and Resnick, as well as a short table of integrals, and the set of one-electron atom spatial eigenfunctions (Table 7-2), so you will not need to write any of that information on your sheet of notes. These materials are all posted on the course website so that you can see exactly what will be provided.

You should bring a calculator.

The exam will cover all material through lecture on Monday November 7<sup>th</sup> and homework 8.
