

Physics 362: Information about the Final Exam

The Final Exam is scheduled for Tuesday December 20, 2005 at 8:00 am in room LL 316 and will last 3 hours. The exam will be closed book, but you may bring one sheet of notes, size 8 ½ by 11 inches, written on both sides, in addition to the 2 sheets you made for the hour exams. (If you didn't keep the sheets from the earlier exams, you may bring three new sheets of notes to the final exam.) The exam itself will contain the information given on the inside cover of Eisberg and Resnick, as well as a short table of integrals, and the set of one-electron atom spatial eigenfunctions (Table 7-2), so you will not need to write any of that information on your sheet of notes. These materials are all posted on the course website so that you can see exactly what will be provided.

You should bring a calculator.

The exam will cover the entire course, but with a strong emphasis on the material covered after the second exam.
