

Mobile Sensing for Cardiovascular Health Study

Volunteer for research at Lehigh University and contribute to discoveries that may improve health care for you, your family, and your community!

Age: Over 18 years

Gender: Any

Health Condition: Healthy or with a history of cardiovascular issues

Description

This study aims to establish a method of remotely and non-invasively collecting cardiovascular signals. The goal is to demonstrate that it's feasible to gather these health indicators without the need for participants to be physically present in a healthcare setting.

This study requires

A smartphone, less than 15 minutes of your time, and filling a questionnaire.

Who can participate

Adults who can read and understand the consent form which is in English language and will be sent to volunteers interested to participate in the study. Participants located within People's Republic of China cannot participate in this study.

Benefits for you

You will also learn about the cool cardiovascular research done

Schedule

Recruitment period
from Nov 1, 2025

Location

Remote; at any location
of your choice
