

Year: 2006 Month: 10

Station moved to shallow water (ca. 2.5m max) at dock from lake center on 28 October 2006
 See figure to right for actual depths of temperature sensors when weather station is in shallow water.

Lake level is mm above lower edge of dock metal frame (mm of water at 4°C based on pressure)
 Monthly rain to date: 4.2 inches daily rain est. from lake level & Scranton Wilkes Airport for periods when station was not collecting.

Precip from rain gage is underestimated during freezing conditions and appears late when air temperature rises above freezing. Lake rise reflects rain or the water equivalent of snow, plus runoff and snowmelt.
