

EIT Workshop

Construction and Field Evaluation of an Electrically Isolated Tendon System in the Coplay Bridge

Field Construction Experience

Lawrence Franko, Pennoni

October 24, 2018
Lehigh University, Bethlehem, PA

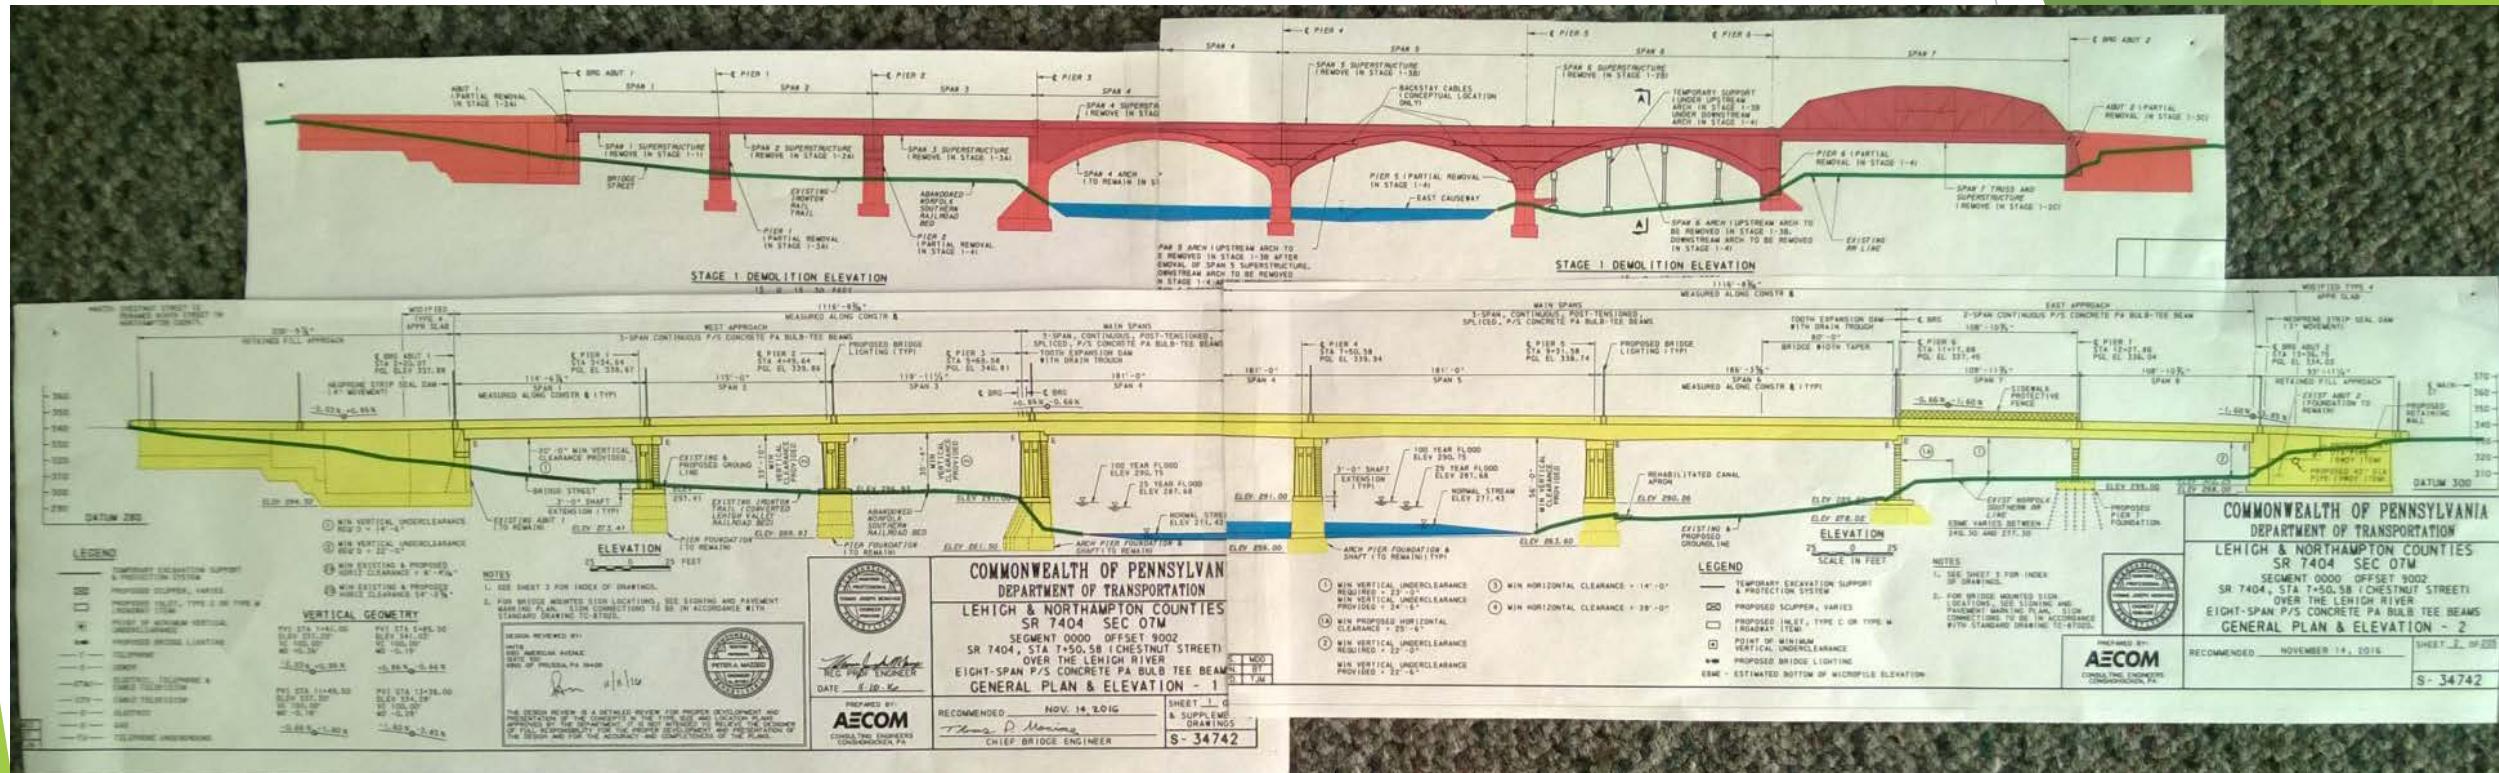

Coplay/Northampton Bridge Project

- ▶ Existing Bridge - 3 Types of structures
- ▶ New Bridge - Prestressed/Post Tension
(utilize portions of existing structure)
- ▶ EIT Demonstration Selection

Existing / New Bridge

EIT Participation

- ▶ FHWA searching for a project that fit the criteria for demonstrating the EIT System
- ▶ FHWA in conjunction with Pa DOT suggested our project
- ▶ After several months of questions and research the project was able to agree to demonstrate the EIT System
- ▶ Project concerns about schedule, time and costs were satisfied.

Existing Bridge - Demolition Stage

Lehigh University EIT Workshop: Cosplay Bridge Demonstration Project – October 24th 2018

Existing Bridge

Lehigh University EIT Workshop: Coplay Bridge Demonstration Project – October 24th 2018

Existing Bridge

Existing Bridge

Lehigh University EIT Workshop: Coplay Bridge Demonstration Project – October 24th 2018

Demolition

Lehigh University EIT Workshop: Coplay Bridge Demonstration Project – October 24th 2018

Construction Stage

- ▶ Piers & Abutments
- ▶ Beam Delivery
- ▶ Beam Erection
- ▶ Closure Joint Duct Splices
- ▶ Closure Joint & Diaphragm Concrete
- ▶ Post Tension Operations
- ▶ EIT

Construction Stage

Lehigh University EIT Workshop: Coplay Bridge Demonstration Project – October 24th 2018

Beam Delivery

Lehigh University EIT Workshop: Coplay Bridge Demonstration Project – October 24th 2018

Beam Delivery

Beam Erection

Lehigh University EIT Workshop: Coplay Bridge Demonstration Project – October 24th 2018

Beam Erection

Lehigh University EIT Workshop: Coplay Bridge Demonstration Project – October 24th 2018

Beam Erection

Lehigh University EIT Workshop: Coplay Bridge Demonstration Project – October 24th 2018

Beam Erection

Beam Erection

Lehigh University EIT Workshop: Coplay Bridge Demonstration Project – October 24th 2018

Erection - Drop-Ins

Lehigh University EIT Workshop: Coplay Bridge Demonstration Project – October 24th 2018

Erection - Drop-Ins

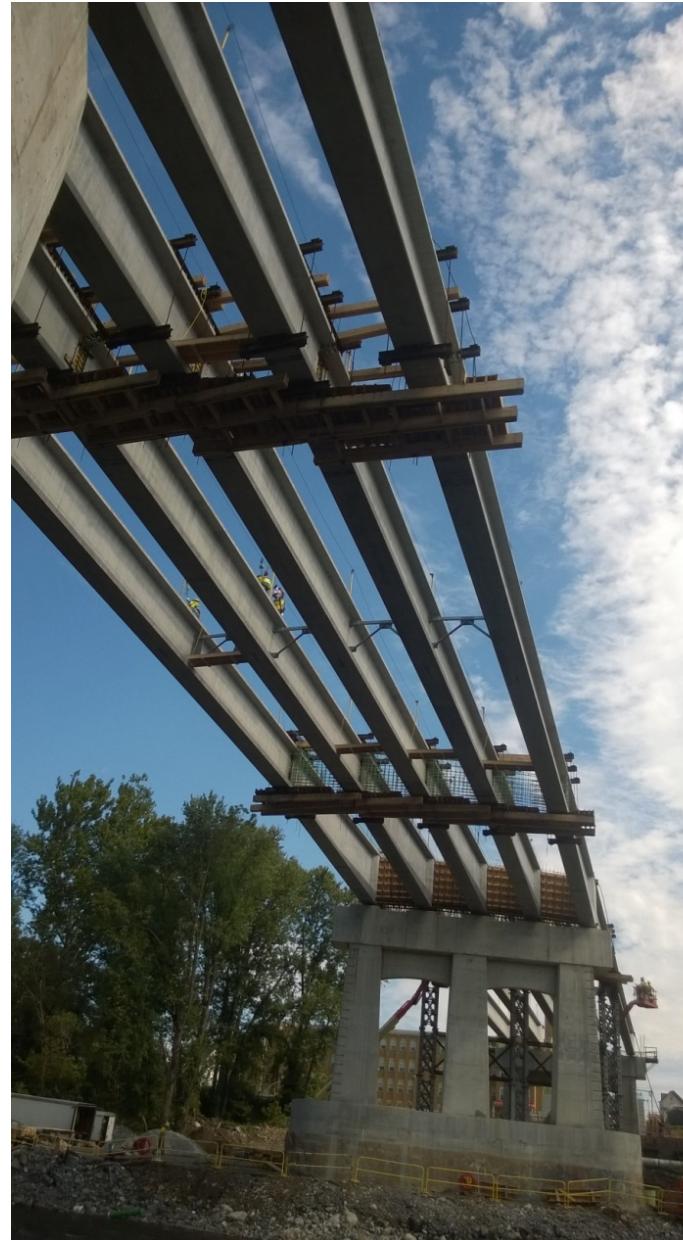

Project Challenges

- ▶ Splice Joints - Drop-Ins and Strongbacks
- ▶ Causing slight beam alignment issues
- ▶ Duct alignment
- ▶ Solution – shims underside of beams
- ▶ Beam Delivery (Travel Route)
- ▶ Mother Nature

Project Challenges

Lehigh University EIT Workshop: Coplay Bridge Demonstration Project – October 24th 2018

Beam Delivery

Project Challenges

EIT System installed / Readings

Lehigh University EIT Workshop: Coplay Bridge Demonstration Project – October 24th 2018

Summary - EIT Usage

- ▶ Design / Review Cost - Nominal (only need to switch a few components in the post tension system)
- ▶ Material Procurement - Nominal (only the increase in cost for EIT components / currently from overseas)
- ▶ Beam Production - Nominal (similar components for PT)
- ▶ Post Tension Operation - Nominal (basically no differences from standard PT)

Construction Time Lapse
