The Fazlur Rahman Khan Distinguished Lecture Series

2007
Honoring a legacy in structural engineering and architecture
http://www.lehigh.edu/~fkm206

Fazlur Rahman Khan
1929 - 1982
Fazlur Rahman Khan ushered in a renaissance in skyscraper construction during the second half of the 20th century. Khan was a pragmatic visionary: the series of progressive ideas that he brought forth for efficient high-rise construction in the 1960s and 1970s were validated in his own work, notably his efficient designs for Chicago’s 100-story John Hancock Center and 110-story Sears Tower (the tallest building in the United States since its completion in 1974).

His characteristic statement to an editor in 1971, having just been selected Construction’s Man of the Century: “The architect must not be in the way of his technology. He must be able to appreciate life; and if life is art, drama, music, and most importantly, people.”

2020 SPEAKERS

Jon Pickard
Principal
Pickard Chilton
New Haven, CT

Gracing the Sky, Enriching the City
February 28, 2020

Aftab A. Mutti
Emeritus Professor
University of Minnesota
Winnipeg, Manitoba, Canada

Intelligent Sensing for Innovative Structures: Development of the New Discipline of Civionics
October 22, 2020 (Virtual Event)

Gregory Delerien
John A. Blume Professor
School of Engineering
Stanford University
Stanford, CA

From Performance-Based Engineering to Urban Resilience
November 19, 2020 (Virtual Event)
