Orientation is just one phase of your Lehigh evoLution designed to help you adjust to college by informing you of valuable resources, setting academic expectations, and helping you integrate into the social community. Highlighted in this schedule are the core developmental competency designations for mandatory events as well as an array of social events to help you get connected. I encourage you to take advantage of all we have planned.

THE PRESIDENTIAL ELECTION—CURRENT ISSUES AND DEBATES
(Maginnes 101)
Presented by Professor Tim Quigley
College campuses typically foster vigorous and open debate about the issues of the day. The Presidential election gives us a prime opportunity to engage in some active debate on the most current issues facing the United States and the world. As Lehigh students, you should participate in these discussions with more than the basic sound bites repeated on the various news channels. In this session, we will discuss and debate some of the more interesting issues from the election and you will be encouraged to bring intellectual rigor to your arguments.

I CAN HAZ CULTURE?: WEB MEMES AND SHARED EXPERIENCE IN A SOCIAL MEDIA SOCIETY
(Maginnes 102)
Presented by Professor Jeremy Littau
From “Success Kid” to “Condescending Wonka,” the viral messaging phenomenon known as “web memes” have grown in popularity the past few years as the Web has become more social. They’re funny, silly, offensive—but they’re also important markers for understanding a culture that blends the real and digital worlds.

HIKING AND BIKING OPPORTUNITIES IN THE LEHIGH VALLEY AND BEYOND
(Maginnes 103)
Presented by Professor Benjamin Felzer
Are you looking to learn about outdoor recreational opportunities in your new setting? This session will provide an introduction to local hiking and biking venues both here in the Lehigh Valley and in the nearby Poconos, as well as a review of local outdoor groups.

IRANIAN NUKEs
(Maginnes 110)
Presented by Professor Chaim Kaufmann
How close is Iran to being able to build nuclear weapons? How would the politics of the Middle East change if it did? Can economic sanctions or a military strike stop Iran from going nuclear?

EXPLORING THE ARTS AND CULTURE OF SOUTH BETHLEHEM
(Maginnes 111)
Presented by Professor Silagh White
Learn about hot spots and ways to find out what’s happening in the community for the next time you desire adventure. Better yet, what to do with your family next time they visit campus!

“WONDERFUL THINGS!”: INDIANA JONES, KING TUT, AND THE PROBLEM OF CULTURAL PATRIMONY
(Maginnes 112)
Presented by Professor Cam Wesson
Public fascination with museums is undeniable. However, most museum patrons have little knowledge of how the objects they flock to see came to be part of a museum’s collection. This lecture explores the various ethical and legal issues surrounding the ownership and display of objects from other people’s cultural heritage.

FROM ‘GLADIATOR’ TO ‘THE HUNGER GAMES’: THE HISTORY OF VIOLENCE IN FILM
(Maginnes 113)
Presented by Professor Nitzan Lebovic
Recent technology allows us to view violence as beautiful. It cuts through time and space in a way that makes us feel super-human. This technology and the images it creates have a long history that is leading from Ancient Rome, to Nazi Germany, and the recent history of the U.S. This session follows the history of violent images, and their impact on our daily life. Movie clips and a lively discussion will enable us to delve into our own understanding and experience of this odd coupling of beauty and blood.

STRONGER, FASTER, CLEANER, SMARTER: MATERIALS FOR THE FUTURE
(Maginnes 260)
Presented by Professor Richard Vinci
Pottery, steel, and silicon each had an enormous impact on humanity when they were first introduced. New game-changing materials are needed to address tomorrow’s challenges. This session will explore historical and emerging technologies to show why advances in materials are critical to the future of our society.

THEATRE AND DESIGN
(Maginnes 270)
Presented by Professor Melpomene Katakalo
Have you gone to a play, looked at the set, and wondered, “How did they think of doing that?” This question and a lot more will be addressed in this discussion about theatre design.

SUSTAINABLE DEVELOPMENT IN A GLOBAL WORLD
(Maginnes 290)
Presented by Professor Rick Weisman
What is “sustainable development” and how has this concept changed since the Rio summit of 1992? How can you become involved at Lehigh to learn more?
ARTIFICIAL INTELLIGENCE: FROM SCIENCE FICTION TO SCIENCE FACT
(Maginnis 480)
Presented by Professor Jeff Hefflin
Science fiction writers have dreamt of some amazing intelligent machines. Although modern scientists have yet to build computers that are as smart as their fictional counterparts, you may be surprised by some of the successes of real-world AI. In this session, we will contrast popular visions of AI with the science of AI.

WHY IS FINANCIAL ACCOUNTING IMPORTANT TO EVERYONE?
(Rauch Business Center 101)
Presented by Professor Kenneth Sinclair
The session is designed to answer the following: 1. Why is Financial Accounting Important to Everyone? 2. What real-life decisions could a person face where an understanding of financial accounting is needed? 3. What do users of financial information hope to learn about a company from its financial information?

SEEING THE WORLD DIFFERENTLY: AN INTRODUCTION TO GEOSPATIAL TOOLS
(Rauch Business Center 137)
Presented by Professor Thomas Hammond
The audience will receive a brief introduction to three sets of geospatial tools (mobile, GPS-enabled devices; dynamic globes such as Google Earth; geographic information systems such as ArcMap), examples of their use in academic instruction, and discuss how their use changes the way students and teachers interact in the classroom.

WHAT HAPPENS ONLINE, STAYS ONLINE... FOREVER
(Rauch Business Center 151)
Presented by Professor Michael Spear
Is technology moral? Do companies have an obligation to prevent the misuse of the products they create? Should users bear all responsibility for the proper use of technology? Through discussion of several vignettes, we will consider the role that we, as the users and creators of technology, should take in limiting harm and maximizing social good in an environment of rapid technological change.

ENTREPRENEURSHIP, CREATIVITY AND INNOVATION!
(Rauch Business Center 161)
Presented by Professor Pat Costa
Students at Lehigh have created new products, technologies and services and launched companies while they were undergraduates! How does that work? What (and who) do you need to know if you want to start something new? Come to this interactive session to discuss how to make the next big thing happen while you are at Lehigh.

DIRECT-TO-CONSUMER GENETIC TESTING: WHAT DO YOU REALLY WANT TO KNOW?
(Rauch Business Center 171)
Presented by Professor Dena Davis
Do you want to know your genetic risk for diabetes? Alzheimer’s? What would you do with the information if you had it? In this session, we look at “direct-to-consumer” genetic testing sites, and discuss why they are controversial, why consumers sign up, and their significance for the future of medicine.

PERSONAL FINANCE
(Rauch Business Center 205)
Presented by Professor Anne Anderson
Overview of Personal Finance: 1. How to manage day to day expenses, planned and unexpected, as a college student? 2. What about credit cards? 3. Savings—when do you start preparing for the future?

AFTER THE BANG: TECHNOLOGICAL CATASTROPHES, ENGINEERING ETHICS AND THE CULTURE OF TECHNOLOGY
(STEPS 101)
Presented by Professor William Best
The 20th Century has seen many highly publicized accidents involving technological systems. The most notable of these include Bhopal, Chernobyl, Challenger, the Titanic, the Dalkon Shield as well as the recent nuclear crisis in Japan. This seminar will address the ethical, political, social and cultural issues that these case studies raise.

FROM MAKING FRIENDS AND GETTING A DATE TO LANDING YOUR DREAM JOB - MARKETING, A PRACTICAL APPROACH
(STEPS 180)
Presented by Professor Beth Gallant
Using the core principles of marketing, you will learn how to make new friends and even get a date! This interactive seminar will teach you how to appeal to your target market. So, if landing that dream job is your objective, learn what you can do now to be the brand they are looking for in 2016! Learn how to market yourself to get what you want!

A CONVERSATION ABOUT POSSIBLE FUTURES
(STEPS 190)
Presented by Professor Keith Gardiner
The discussion will range from the early days of nuclear power through to the development of the first commercial semiconductor memories. We will capture ideas of possibilities for the future notwithstanding current alarms about climate, food, population, poverty and unbalanced global distributions.
lehigh symposium (continued)

ADVANCES IN AERONAUTICAL ENGINEERING DURING WWI AND ITS IMPACT ON MODERN AVIATION
(STEMS 280)
Presented by Professor Herman Nied
In 1914 airplanes were considered to be interesting novelties with limited military value. Not surprising, since heavier-than-air powered flight was only ten years old. However, during WWI aeronautical engineering was completely revolutionized. Who were the engineers responsible for these remarkable advances in technology and what were their discoveries? Prof. Nied reviews this history, including some personal family photographs and drawings from the dawn of aviation.

100 YEARS OF AEROSPACE ENGINEERING
(STEMS 290)
Presented by Professor Terry Hart
The progress made in the past 100 years of aerospace engineering has been nothing short of spectacular, from the Wright brothers, to the landings on the Moon, deep space probes and rovers on Mars, as well as many commercial successes, including Boeing’s 787 Dreamliner. Prof. Hart reviews this history and shares many of his personal stories of his involvement.

PHYSICS OF CELL MOTION
(STEMS 490)
Presented by Professor Dimitrios Vavylonis
How do living cells within our bodies move to heal wounds and how do they reorganize to shape tissues when an embryo develops? Learn how the biophysics of protein fiber self-assembly into dynamic and contractile meshworks underlie these fascinating processes.
