

INTERDISCIPLINARY OPPORTUNITIES

Real-world problems don't belong to a single discipline—and neither should your education. At Lehigh, our interdisciplinary programs empower you to fuse ideas across fields, tackle complex challenges and drive real impact.

Intercollege Interdisciplinary Programs

The signature four-year programs listed below allow you to take courses in two colleges, preparing you to take on the most complex, fascinating challenges at the intersection of industries.

Computer Science and Business (CSB)

The CSB program provides a rigorous computer science education integrated with in-depth business training. Graduates of the program are ideal candidates for placement within public accounting firms, consulting companies, top software firms and startup companies.

Integrated Business and Health (IBH)

The IBH program prepares you to become a leader in the health industry. You will develop a deep understanding of business, economics, health and health policy. With this degree, you will be equipped to address the vital conditions that shape community health and promote equity.

Integrated Business and Engineering (IBE)

The IBE program focuses on entrepreneurship and product development, preparing you to navigate modern market demands and drive innovation. By combining technical engineering knowledge with business, communication and leadership skills, graduates are positioned for long-term success.

Integrated Degree in Engineering and Arts & Sciences (IDEAS)

The IDEAS program provides opportunities for you to become a cross-disciplinary innovator. Graduates are well-versed in dual focus areas, combining a discipline from engineering with one from the arts, humanities, social sciences, mathematics or natural sciences.

We also offer a five-year Arts and Engineering program so you can pursue a dual degree in these distinct yet complementary areas.

STUDENT SPOTLIGHT

Lucas Koranda '26

Program: Integrated Business and Engineering (IBE)

Majors: Industrial and Systems Engineering, Finance

Hometown: Waikoloa, HI

"Lehigh's interdisciplinary curriculum has equipped me with core skills and values essential for navigating complex situations in our ever-changing world. Through active participation and constructive feedback, IBE classes foster initiative, adaptability, confidence, analytical thinking and effective communication skills."

Interdisciplinary
Programs at Lehigh*

Explore Lehigh Program

The Explore Lehigh program is designed for students who are undecided or are considering multiple areas of study and wish to explore which of Lehigh's colleges or integrated programs are right for them.

Spend your first semester diving into big questions, sharpening essential skills, and sampling courses across all our colleges—giving you the freedom to choose your academic direction thoughtfully, without the pressure of declaring right away.

Interdisciplinary Majors in the College of Arts & Sciences

Within the College of Arts & Sciences you'll find interdisciplinary majors that bring together multiple fields such as the humanities, social sciences, mathematics and natural sciences within the context of a single program of study.

- Africana Studies
- Asian and Asian American Studies
- Cognitive Science
- Environmental Studies
- Global Studies
- Health, Medicine & Society
- Latin American & Latino Studies
- Women, Gender & Sexuality Studies

Individual Interdisciplinary Opportunities

There are also limitless opportunities to create your own interdisciplinary studies at Lehigh. Students are admitted undeclared to their college of admission and can forge their own personalized path of study through individual advising, workshops, information sessions and more.

- Minor in a different college (available to all students)
 - Business
 - Data Science
