

## Modifying Course Menu

You can now modify your course menu. Realize though that when you change the name of an item in the menu, the name also changes in your Control Panel.

To change or remove options from your course menu:

- click "control panel"
- click "manage course menu"
- click "modify" next to the button (option) that you would like to change
- If you would like to add a new button, click "Add Content Area" and Type in what you want the Option to be called. Then press submit. It will then add that new option (Button) to the bottom of the course menu and you can use the #'s that are on the left to change the order.
- if you would like to remove a button (option), click the remove button
